INNOVATION & ENVIRONMENT
REGIONS OF EUROPE SHARING SOLUTIONS

European Union
European Regional Development Fund

Imagine you are going to Italy in 2020. Describe how you imagine to travel there: How will you plan your trip? How will you pay for your trip? How will you be assisted during the trip?

What are the most important transfers that have taken place during your project?

Can you give a good example of cooperation between partners?

What barriers to integrated mobility solutions did you encounter?

Is it difficult to implement and to integrate new ITS/ICT solutions for public transport in your region? If yes – why?

What should public authorities on the regional, national and European level focus on when investing in ITS for Public Transport?

Projects like SUPERHUB, POSSE and POLITE are only supposed to be the starting point of more long-term implementation.

Is there a viable business model for integrated mobility platforms?

Thank you for your attention!
